Sunne Sunne - the self-powered solar light that captures, stores and produces light indoors. By day, it harvests energy from the sun while it hangs by your window, and by night, it brings sunlight into your home. The Sunne Experience - is a light installation that draws you closer to the sun. The Sunne lights mimic the daily cycle of the sun with Sunne Rise, Sunne Light and Sunne Set. Sunne Experience starts with a minimum of 5 Sunne lights and can be set to 3 different light settings, as well as its custom programming (alternating between settings). Sunne Studio Version - starts with a minimum of 10 Sunne lights and includes rebuild power supply, software design and the sound composition. A single Sunne is normally solar-powered, harvesting energy by day to light your home at night, but for this experience it is placed in a network of Sunnes, and has been rebuilt for normal power. This way it is suitable for darker indoor spaces.

Graypants custom request

Loci

Loci is an innovative and highly customizable suspension light. The name, Latin in origin, translates to a particular position, point, or place, and refers to the series' innovative method of achieving hundreds or thousands of angular points of light in an installation.

Loci comes in tunable white, including remote control, and five standard designs: Ring, Spiral Ring, Mobius, Rain and Wave, but any number of pendants can be used to create unique designs customized to fit your specifications. The individual pendants within each design are made of solid frosted diffusers and can also be specified in various shapes. When lit, the pendants emit a soft glow highlighting their respective designs in tandem with a powerful expression of the overall design of the installation.

Murmurations

Murmurations are custom installations inspired by a breathtaking natural phenomenon. Flocking is considered an emergent behavior arising from simple rules that are followed by individuals without any central coordination. By creating our own simple design rules, we are able to create dynamic light installations comprising of a single layered cardboard pendant.
